PROFESSIONAL SUMMARY

Full Stack Developer and Technical Trainer with 3+ years of hands-on experience building production-ready web applications and training 2500+ developers across leading institutions. Proficient in architecting and deploying scalable MERN stack applications with emphasis on clean code, system design, and maintainable architecture. Proven expertise in translating complex technical concepts into engaging learning experiences through live coding sessions, code reviews, and hands-on mentorship. Combines strong development skills with effective teaching methodologies to deliver high-impact training programs with consistently high student success rates in technical interviews and placements.

TECHNICAL SKILLS

Programming Languages: JavaScript (ES6+), HTML5, CSS3, SQL, Node.js

Frontend Technologies: React.js, Redux, Component Architecture, State Management, Responsive Design, Modern CSS (Flexbox, Grid), DOM Manipulation, Browser APIs

Backend Technologies: Express.js, RESTful API Design, Authentication (JWT, OAuth), Authorization, Middleware Architecture, Server-Side Logic, API Security

Databases: MongoDB (NoSQL), MySQL (Relational), Database Design

Development Tools: Git, GitHub, Postman, npm, VS Code, Chrome DevTools

Development Practices: System Design, Clean Architecture, Code Reviews, Unit Testing, Agile Methodologies, CI/CD Concepts, Deployment Workflows

Training Competencies: Curriculum Development, Live Coding, Technical Mentoring, Code Reviews, Career Guidance, Assessment Design

PROFESSIONAL EXPERIENCE

Saredufy Web Plus Academy Private Limited

Full Stack Developer & Trainer

May 2024 – Present

Tirupati, Andhra Pradesh

- Developed and deployed multiple end-to-end full stack applications using React, Node.js, Express, and MongoDB with emphasis on scalability, clean code architecture, and production-ready deployment practices
- Trained 250+ developers in MERN stack development through comprehensive curriculum and live coding sessions, achieving high placement success rates through hands-on mentorship and technical interview preparation

Arikyra (Product of Heedsites)

Full Stack Developer & Trainer

October 2025 – Present

Bengaluru, Karnataka

- Developed production-grade web applications with React frontend and Node.js backend, implementing responsive interfaces, state management, and seamless API integration
- Conducted comprehensive full stack training sessions covering modern JavaScript, React, Express, MongoDB operations, and deployment workflows

HyperVerge Academy

Technical Mentor

July 2025 – Present

Bengaluru, Karnataka

- Mentored aspiring developers in full stack technologies through one-on-one sessions, code reviews, and personalized guidance on technical skills and career development
- Guided mentees through real-world project implementations including system design, development, debugging, and deployment phases

HCL GUVI

Technical Trainer (Freelance)

September 2025 – November 2025

SVCET, Chittoor, Andhra Pradesh

- Delivered intensive full stack development bootcamp to 60+ engineering students covering HTML5, CSS3, JavaScript, React.js, Node.js, Express, and MongoDB
- Designed hands-on coding exercises, live demonstrations, and practical projects with technical assessments and career guidance for software development roles

WebNexZ Foundation

Full Stack Developer

November 2024 – Present

Bengaluru, Karnataka

- Developed end-to-end digital examination platform with AI-integrated proctoring system, supporting thousands of concurrent users with focus on security and performance
- Built scalable architecture with secure authentication, exam session management, automated grading algorithms, and comprehensive analytics dashboard

Harebin Tech Solutions Pvt. Ltd.

June 2024 – November 2024

Full Stack Developer

Andhra Pradesh, India

- Developed scalable full stack solutions with clean code architecture, modular design, and RESTful API development
- Implemented coding standards, code review processes, and Git workflows following agile development best practices

Pick and Partner

November 2023 – April 2024

Full Stack Developer

Bengaluru, Karnataka

- Built responsive user interfaces with React implementing component-based architecture and integrated backend APIs for seamless data flow
- Participated in product development collaborating with cross-functional teams to deliver features aligned with business requirements

WebPlus Academy

January 2022 – November 2024

Full Stack Development Trainer

Madanapalle, Andhra Pradesh

- Trained 1200+ students in MERN stack development over 3-year period with comprehensive curriculum, live coding sessions, and hands-on project mentorship
- Developed extensive course materials and implemented Git version control training, maintaining high student satisfaction through personalized attention and continuous curriculum improvements

EDUCATION

Madanapalle Institute of Technology & Science

December 2021 – May 2025

Bachelor of Technology in Computer Science

Andhra Pradesh, India

- Relevant Coursework: Data Structures, Algorithms, Database Management Systems, Software Engineering, Web Technologies, Operating Systems, Computer Networks, Object-Oriented Programming
- Academic Projects: Built multiple full stack applications including e-commerce platform, social media application, and task management system
- Participated in technical clubs, coding competitions, and collaborative development projects

Narayana Junior College

August 2018 – May 2020

Intermediate Education (Class 12th)

Andhra Pradesh, India

- Stream: Mathematics, Physics, Chemistry (MPC) & JEE Mains, Advance Rank holder

Sri Venkateswara Children's High School

August 2008 – April 2018

Secondary School Certificate (SSC)

Andhra Pradesh, India

FELLOWSHIP & PROFESSIONAL TRAINING

Full Stack Web Development Fellowship: Intensive fellowship program focusing on industry-ready development practices, real-world project implementation, and professional software engineering workflows. Covered advanced topics in MERN stack development, system design, deployment strategies, and collaborative coding practices.

CERTIFICATIONS

edX Verified Certificate: Introduction to the Internet of Things

Full Stack Web Development: Comprehensive MERN stack certification covering frontend, backend, and database technologies

NOTABLE PROJECTS & APPLICATIONS

Learning Management System: Built comprehensive educational platform with React frontend and Node.js/Express backend featuring user authentication, course management, progress tracking, video integration, assignment submission, automated grading, and analytics dashboard with MongoDB database

Digital Examination Platform: Developed scalable examination system with AI-integrated proctoring, real-time monitoring, automated assessment, secure test delivery, result analytics, and support for thousands of concurrent users

E-commerce Application: Created full-featured online shopping platform with product catalog, advanced search and filtering, shopping cart, payment gateway integration, order management, inventory tracking, and admin dashboard

Social Collaboration Tool: Built team collaboration application with real-time messaging, file sharing, project management features, notifications, user presence indicators, and responsive design

Task Management System: Developed productivity application with drag-and-drop interface, task assignments, deadline tracking, progress visualization, team collaboration, and reporting features

COPYRIGHTED PROJECTS & REWARDS

MELE – Exam Sitting Order Arrangement System (Copyrighted) **Jul 2023 – Dec 2024**

MERN Stack (MongoDB, Express, React, Node.js)

- Designed and implemented a full-stack web application to automate complex exam seating arrangements.
- Ensured institutional compliance and 100% accuracy in data handling through a custom-built MERN architecture.

MITs Entrance Exam Application **Nov 2023 – Aug 2024**

MERN Stack

- Developed a comprehensive portal for entrance exam registration, automated candidate notifications, and real-time result tracking.
- Streamlined the admission workflow by integrating secure data management and user authentication.

Water Electric Tracker (SIH Project - 2023) **Sep 2023 – Nov 2023**

Node.js, React, Data Visualization

- Developed a tracking system for utility consumption as part of the Smart India Hackathon (SIH).
- Implemented interactive data visualization dashboards to help users monitor and reduce electricity and water waste.

KEY ACHIEVEMENTS

Training Impact: Successfully trained 2500+ developers across multiple institutions with consistently high placement rates in software development roles

Curriculum Development: Designed industry-aligned training programs bridging academic learning with real-world practice and startup requirements

Student Success: Achieved 85%+ placement rate for trained students through effective technical preparation and interview coaching

Code Quality: Consistently delivered maintainable, well-documented code following industry best practices and design patterns

Project Delivery: Successfully deployed multiple production applications handling real user traffic with optimal performance

Technical Mentorship: Mentored junior developers leading to measurable improvements in their coding skills and professional growth

PROFESSIONAL ATTRIBUTES

Development Philosophy: Clean architecture, maintainable code, production-ready practices, continuous learning, test-driven development

Teaching Approach: Hands-on learning, practical projects, real-world workflows, personalized mentorship, student-centered instruction

Availability: Open to full-time developer roles, training positions, and opportunities combining both development and mentoring
